1. Algemeen

Hierdie skema sal gebaseer word op die beleid, riglyne en tipe heiningstandaarde soos vervat in die Provinsiale Padomheiningshandleiding, wat aan die Provinsiale Streekskantore en Distriksmunisipaliteite se paaië afdelings voorsien word.

2. Verlening van Subsidie

Die Distriksmunisipaliteit staan 'n subsidie toe op die totale beraamde koste betrokke vir die oprigting van 'n standaard omheining en wat in praktyk beteken dat dit slegs die aankoopprys van die materiale komponent vir die tipe van omheining per km sal behels, in ooreenstemming met die pryse wat op 'n jaarlikse basis verkry word by die plaaslike diensverskaffers (koöperasies) en/of tenders.

3. Aansoeke

- 3.1 Die subsidieskema vir aansoeke sal jaarliks in die pers geadverteer word.
- 3.2 Die aansoek moet by die Distriksmunisipaliteit op 'n voorgeskrewe aansoekvorm ingedien word.
- 3.3 Subsidies sal toegeken word met inagneming van behoeftes en verspreiding regoor die gebied.
- 3.4 Na oorweging van eie geïdentifiseerde behoeftes (bv. begroting beskikbaar, klas van pad betrokke, risiko's betrokke, ens.) sal die Kaapse Wynland Distriksmunisipaliteit (Direktoraat: Paaië) saam met die Provinsiale Padowerheid se Streekskantore alle aansoeke wat ontvang is, prioritiseer.

4. Uitkoms

- 4.1 Die grondeienaar(s) sal skriftelik ingelig word deur die Distriksmunisipaliteit van die uitkoms.
- 4.2 Indien die uitkoms positief is, sal die grondeienaar eers deur 'n tegniese verteenwoordiger van die Distriksmunisipaliteit besoek word voordat daar met werk begin mag word, ten einde enige onduidelikheid oor die proses of spesifikasies te finaliseer.

1. General

This scheme will be based on the policy, guidelines and type of fencing standards contained in the Provincial Roads Fencing Guide, which is provided to the Provincial Regional Offices and the District Municipalities' roads divisions.

2. Granting of Subsidy

The District Municipality grants a subsidy on the total estimated costs involved for the construction of a standard fence and this means in practice that it will only entail the purchase price of the material component for the type of fencing per km, according to the prices obtained on an annual basis from the local service providers (co-operatives) and/or tenders.

3. Applications

- 3.1 The subsidy scheme for applications will annually be advertised in the press.
- 3.2 The application must be submitted to the District Municipality on the prescribed form.
- 3.3 Subsidies will be awarded by taking the needs and distribution throughout the area into account.
- 3.4 After consideration of own identified needs (e.g. budget available, type of road involved, risks involved, etc.) the Cape Winelands District Municipality (Directorate: Roads), together with the Provincial Roads Authority's Regional Offices, will prioritize all applications received.

4. Outcome

- 4.1 The landowner(s) will be notified by the District Municipality in writing of the outcome.
- 4.2 If the outcome is positive, the landowner will first be visited by a technical representative of the District Municipality before any work may commence in order to finalize any queries regarding the process or specifications.

5. Aanvanklike Koste

Die grondeienaar dra eers aanvanklik al die kostes vir die aankoop van die omheiningsmateriaal (volgens die voorgeskrewe spesifikasies van die Provinsiale Padowerheid) asook die oprigtingskoste.

6. Voltooiingstydperk

'n Voltooiingstydperk van twee (2) maande na die datum van goedkeuring van 'n aansoek sal gehandhaaf word.

7. Inspeksie van Voltooide Werk

'n Inspeksie sal na afloop van die twee (2) maande voltooiingstydperk geskied om te bevestig of die werk gedoen is al dan nie, en in ooreenstemming met die voorgeskrewe standarde, waarna 'n uitbetaling aan die grondeienaar gemaak sal word.

8. Goedkeuring van Aansoeke

Volmag is aan die Munisipale Bestuurder en Bestuurder: Paaie verleen word om aansoeke goed te keur.

5. Initial Costs

The landowner initially bears all the costs for purchasing the fencing material (according to the prescribed specifications of the Provincial Roads Authority) as well as the construction costs.

6. Completion Period

A completion period of two (2) months from the date of approval of an application will be maintained.

7. Inspection of Completed Work

An inspection will take place after the two (2) months completion period to confirm whether the work was done or not, and according to prescribed standards, after which a payment will be made to the landowner.

8. Approval of Applications

Authorisation is granted to the Municipal Manager and Manager: Roads to approve applications.

CAPE WINELANDS DISTRICT MUNICIPALITY: ROADS DIVISION

FENCING SUBSIDY – 2013 / 2014

PROVINCIAL ROADS:

Trunk Roads, Main roads, District roads and Minor roads

SPECIFICATIONS

1. STOCK-PROOF FENCES

Treated poles (100 – 125 mm in diameter and 2.10 metres in length) placed 10 metres apart with five (5) treated droppers (50 – 60 mm in diameter and 1.50 metres long) between poles and five (5) barbed and four (4) smooth fencing wire.

Subsidy: R20 000.00 per 1 000 metres fencing erected (excl. VAT).

P.S.: All totals rounded off to the nearest R100.

APPROVED BY: MANAGER: ROADS DIVISION

SIGNATURE:

DATE:

COMMENTS:

Approval based on Council Resolution to subsidise the constructing of a standard fence and in practice this means that it will only entail the purchase price component of the materials fencing, but no labour will be provided.

Total (excluding VAT)		<u>R44 917.00</u>

FENCING SUBSIDY CONTRACT

PARTIES TO THE CONTRACT:

The parties shall be the registered landowner or his/her legal representative and the relevant District Municipality.

PURPOSE OF THE CONTRACT:

The purpose is to legally contract the parties to the delivery of the fencing in accordance with the distances, positioning, location and specification hereby agreed upon and the resultant subsidy payment within two calendar months by the District Municipality to the landowner or his / her legal representative after formal approval of the fencing.

Please note that where the fencing does not comply to the specifications as detailed by the District Municipality and has not been accepted in writing as complying with the specifications (formal approval), the subsidy will not be paid to the applicant.

The above specifications are as follows:

Road number: Road name:

Fencing distances as per km markers:

Distance left of road: From km..... to km Sub-total: km

From km to km Sub-total: km

From km to km Sub-total: km

TOTAL left km:

Distance right of road: From km to km Sub-total km

From km to km Sub-total km

From km to km Sub-total km

TOTAL right km:

TOTAL distance of fencing in km:.....

Number of grid gates removed (left and right):

Number of swing gates removed (left and right):

Specifications of fencing (plans attached if necessary):.....

Subsidy payable according to specifications: R kilometer of fencing.
