16. Specific Goals in terms of section 2 (1) (d) (i) and (ii) of the Preferential Procurement Policy Framework Act

16.1 Broad-based black economic empowerment (B-BBEE) status level certificates

Bidders are required to submit original and valid B-BBEE Status Level Verification Certificates or certified copies of the original, not a photo-copy of another certified copy thereof together with their bids, to substantiate their B-BBEE rating claims.

Bidders who do not submit B-BBEE Status Level Verification Certificates or who are non-compliant contributors to B-BBEE do not qualify for preference points for B-BBEE but should not be disqualified from the bidding process. They will score points out of 90 or 80 for price only and zero (0) points for B-BBEE.

A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid.

Public entities and tertiary institutions must also submit B-BBEE Status Level Verification Certificates together with their bids.

If an institution is already in possession of a valid and original or certified copy of a bidder's B-BBEE Status Level Verification Certificate that was obtained for the purpose of establishing the database of possible suppliers for price quotations or that was submitted together with another bid, it is not necessary to obtain a new B-BBEE Status Level Verification Certificate each time a bid is submitted from the specific bidder.

Such a certificate may be used to substantiate B-BBEE rating claims provided that the closing date of the bid falls within the expiry date of the certificate that is in the institution's possession.

Each time this provision is applied, cross-reference must be made to the B-BBEE Status Level Verification Certificate already in possession for audit purposes.

AOs / AAs must ensure that the B-BBEE Status Level Verification Certificates submitted are issued by the following agencies:

Bidders other than EMEs

- Verification agencies accredited by SANAS; or
- Registered auditors approved by IRBA (until the expiration of the period prescribed by the DTI)

Bidders who qualify as EMEs

- Sworn affidavit signed by the EME representative and attested by a Commissioner of oaths.

The relevant approved registered auditor may be contacted to confirm whether such a certificate was issued.

Accounting officers as contemplated in section 60(4) of the CCA;

These certificates will be issued on the accounting officer's letterhead with the accounting officer's practice number and contact number clearly specified on the face of the certificates.

The content of B-BBEE Status Level Verification Certificates issued by accounting officers as contemplated in the CCA is detailed in paragraph 4.8.5 below.

In terms of the Generic Codes of Good Practice, an enterprise including a sole propriety with annual total revenue of R10 million or less qualifies as an EME.

In instances where Sector Charters are developed to address the transformation challenges of specific sectors or industries, the threshold for qualification as an EME may be different from the generic threshold of R10 million. The relevant Sector Charter thresholds will therefore be used as a basis for a potential bidder to qualify as an EME.

- For example, the approved thresholds for EMEs for the Tourism and Construction Sector Charters are R2.5 million and R1.5 million respectively.
- An EME automatically qualifies as a level 4 contributor with B-BBEE recognition level of 100% in terms of the Codes of Good Practice.

- An EME that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as Level 1 contributor with B-BBEE level of 135% in terms of Codes of Good Practice.
- An EME that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- An EME is required to submit a sworn affidavit confirming their annual total revenue of R 10 million or less and level of black ownership to claim points
- An EME that is regarded as a Specialized Enterprise, is required to submit a sworn affidavit confirming their annual turnover/ allocated budget/ gross receipt of R 10 million or less and level of percentage of black beneficiaries to claim points
- An EME may be measured in terms of the QSE scorecard should they wish to maximize their points and move to a higher B-BBEE recognition level. It is in this context that an EME may submit a B-BBEE verification certificate.

ELIGIBILITY AS QUALIFYING SMALL ENTERPRISES (QSE)

The Codes define a QSE as any enterprise with annual total revenue of between R10 million and R50 million.

- A QSE with at least 51% black ownership qualifies as a Level 2 contributor.
- A QSE with 100% black ownership qualifies as a Level 1 Contributor.
- A QSE that is regarded as a specialized enterprise with at least 75% black beneficiaries qualifies as a Level 1 contributor with B-BBEE level of 135% in terms of the Codes of Good Practice.
- A QSE that is regarded as a specialized enterprise with at least 51% black beneficiaries qualifies as a Level 2 contributor with B-BBEE level of 125% in terms of the Codes of Good Practice.
- A QSE is required to submit a sworn affidavit confirming their annual total revenue of between R10 million and R 50 million and level of black ownership or a B-BBEE level verification certificate to claim points

F. SPECIAL CONDITIONS OF CONTRACT AND TERMS OF REFERENCE

1. INTRODUCTION AND BACKGROUND

- 1.1. The Cape Winelands District Municipality (CWDM) computer network is the bedrock of our collaborative endeavors, designed to foster communication, resource sharing, and innovation. Bolstered by both wired and wireless connections, this network is decentralized with a hybrid cloud server architecture. The network includes software defined wide area network (SD-WAN) integration. The SD-WAN integration ensures that the various buildings are seamlessly connected. This computer network provides streamlined data flow, reduced latency, and opportunity for interdepartmental collaboration.
- 1.2. Central to the CWDM network security architecture is the Sophos firewall. The Sophos firewall works against the ever-evolving landscape of cyber threats. In a digital landscape, the Sophos firewall's multi-faceted protection strategies shield CWDM from unauthorized access, malware, and data breaches. The firewall's synergy with our SD-WAN network enhances CWDMs ability to secure data across dispersed locations while maintaining consistent, robust defenses. Some of the key features of Sophos Firewall solution include:
- 1.2.1 Advanced Threat Protection: Sophos Firewall uses a combination of signature-based, behavior-based, and machine learning techniques to detect and block known and unknown threats.
- 1.2.2 Intrusion Prevention System (IPS): Sophos Firewall IPS can block malicious traffic at the network level, preventing it from reaching your endpoints.
- 1.2.3 Web Protection: Sophos Firewall Web Protection can block malicious websites and prevent users from downloading infected files.
- 1.2.4 Application Control: Sophos Firewall Application Control can control which applications are allowed to run on your network, helping to prevent unauthorized software from being installed.
- 1.2.5 Data Loss Prevention (DLP): Sophos Firewall DLP can prevent sensitive data from being exfiltrated from your network.
- 1.2.6 Remote Access: Sophos Firewall Remote Access can provide secure access to your network for remote users.
- 1.2.7 SD-WAN: Sophos Firewall SD-WAN can help you to optimize your WAN bandwidth and improve the performance of your remote users.
- 1.3 The SD-WAN implementation intelligently routes traffic across CWDM buildings. With the SD-WAN framework, the CWDM operates seamlessly across multiple locations as if they were all under one roof.

2. PURPOSE OF TENDER

- 2.1 The purpose of this tender is to upgrade the CWDM single Sophos XG340 firewall. The Sophos XG340 is a discontinued firewall model. The next generation of Sophos firewalls is the XGS series.

- 2.2 The upgrade required is for the XG340 firewall to be replaced by two compatible firewalls in an active-passive High Availability (HA) configuration. This means that one firewall will be active and handling all traffic, while the other firewall will be passive and waiting to take over if the active firewall fails. The firewalls will be joined via a layer 2 point to point link.

3. SCOPE OF WORK / TERMS OF REFERENCE

- 3.1 The CWDM requires a suitable service provider to:
- 3.1.1 Deliver and install two Primary Firewalls in the HA configuration including all license requirements. The new firewalls must integrate into Sophos Central and the currently deployed Sophos SD-RED-60 devices.
- 3.1.2 Deliver and install one Secondary Firewall that must integrate into Sophos Central
- 3.1.3 Provide a penetration test on the Firewalls after installation from outside the network.

Figure 1

- 3.2 The figure1 above is an illustration of the solution that is required. The Figure 1 illustrates the Primary Firewalls. It includes one Active Firewall through which all network traffic will flow. The Active Firewall is connected to the internet and the SD-WAN devices. The SD-WAN devices provide network connectivity between the different CWDM Buildings. The Passive Firewall is connected via a Point-to-Point link and monitors the Active Firewall for failure. If the Active Firewall fails, the Passive Firewall will change its state from Passive to Active and provide the services previously provided by the Active Firewall. This change will happen seamlessly without the SD-WAN involvement.
- 3.3 The Primary Firewalls must be powered by a dual-core CPU and a dedicated hardware accelerator or greater. This combination of hardware provides a firewall throughput of up to 75 Gbps and a VPN throughput of up to 8,000 Mbps. The Primary Firewalls must be able to handle up to 100,000 concurrent connections.

3.4 The Firewall configurations must be as follows:

- a. The two primary firewalls must be the same model and firmware version.
- b. The same software version must be installed on both firewalls.
- c. Configure the same network settings on both firewalls.
- d. Configure the same security policies on both firewalls.
- e. Configure the High Availability (HA) settings on both firewalls.
- f. The HA settings on the firewalls must include the following:
 - I. Initial device role: This setting specifies whether the firewall is the active firewall or the passive firewall.
 - II. HA configuration mode: This setting specifies how the firewalls will communicate with each other.
- g. The configuration must include a cluster ID. This setting is a unique identifier for the HA cluster.
- h. The Node name setting must be the name of the firewall.

3.5 Once the vendor has configured the HA settings on the firewalls, the CWDM will test the HA configuration by simulating a failure on the active firewall. If the passive firewall takes over as the active firewall and traffic continues to be handled, then the HA configuration is working properly.

3.6 The required Primary Firewall security features delivered on the Firewalls are:

- Intrusion prevention system (IPS)
- Anti-virus
- Anti-malware
- Application control
- Data loss prevention (DLP)
- Zero-day protection
- Threat intelligence: This feature provides real-time threat intelligence from the Firewall Vendor to help protect your network from the latest threats.
- Machine learning: This feature uses machine learning to identify and block threats that are not yet known.
- Sandboxing: This feature isolates suspicious files in a virtual environment to analyse them without affecting the network.
- URL filtering: This feature blocks access to malicious or unwanted websites.
- Content filtering: This feature blocks access to content that is not appropriate for the network, such as pornography or gambling.

- Anti-spam: This feature blocks spam emails
 - Provide 24/7 support from the Firewall vendor experts.
- 3.7 The Secondary Firewall appliance for remote offices features must include:
- 3.7.1 CPU: 2.2 GHz quad-core
 - 3.7.2 RAM: 8 GB DDR4

 - 3.7.15.6 Anti-spam
 - 3.8. Firewalls must have a central management console that provides a single pane for managing all the security products. The central management console must integrate with Sophos Central. Sophos Central manages the RED devices that provide the networking between the building in the various locations.
 - 3.9. End point protection must be delivered with the Firewalls. Endpoint protection is a security solution that protects individual devices, such as servers, laptops, desktops, and smartphones, from malware, ransomware, and other threats. O. CERTIFICATE OF INDEPENDENT BID DETERMINATION (MBD 9)

1. This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
